Kuali Rice 1.0.3.2 Release Notes

Kuali Rice Team `<rice.collab@kuali.org>`

This document contains a cumulative list of work accomplished between versions 1.0.3.1 and 1.0.3.2. It also contains the steps necessary in upgrading from release 1.0.3.1 to 1.0.3.2

June 2011

Table of Contents

Overview

This Release Notes documentation includes information on the list of changes between Rice 1.0.3.1 (released February 2011) and Rice 1.0.3.2.

If you encounter any difficulty, please don't hesitate to contact the Rice team on our public collaboration mailing list at `<rice.collab@kuali.org>`

Highlights of this release include:

- Support for Tomcat 7

- Performance fixes

- Numerous bug fixes

Kuali Rice 1.0.3.2 can be downloaded from the Rice website at http://kuali.org/rice/download.

There are three different distributions of Rice available: source, binary and server. Please read the Installation Guide for more details on each of these distributions.

Documentation for this release can be found at at http://kuali.org/rice/docs/1.0.3.2.

Bug Fix

[KULRICE-4680](): KIM Type is not copied onto the person document version of the group object

[KULRICE-5022](): RoleServiceImpl.getRoleQualifiersForPrincipalIncludingNested(..) returns wrong result

[KULRICE-5026](): Hiding Base Salary Amount on Person Inquiry causes next two fields to shift left and appear under the wrong headings.

KULRICE-5031: Occasional NullPointerExceptions in StyleableEmailContentServiceImpl

KULRICE-5040: DataExporter class in KNS does not flush outputstream after export which can result in truncated xml files

KULRICE-5044: createproject.pom.template points to https://test.kuali.org/maven

KULRICE-5047: createproject.groovy is broken on 1.0.3.1

KULRICE-5077: Lookup - Conditional enabling of 'return value' causes issues with the Lookup result table alignment

KULRICE-5078: MultiLookup Export functionality failing for pages spilling beyond a certain size

KULRICE-5089: Nested KSB Calls failing due to Null LocaleResolver reference

KULRICE-5097: KIM Caches are not being flushed as required.

KULRICE-5106: Maintenance Document does not display attached file

KULRICE-5118: Old attachments in Maintenance Documents not showing except on a document reload

KULRICE-5120: Deletes from a collection in a Maintenance Documents do not persist to BO table

KULRICE-5140: "java.sql.SQLException: Closed Connection" errors happening after rice applications run for a period of time

KULRICE-5166: methods in BusinessObjectAuthorizationService assume an inquiry collection will contain objects of type BusinessObjectEntry

KULRICE-5170: BeanPropertyComparator throws exception when a null value is found in sortable non-string data type column.

KULRICE-5199: Fix overrice="false" in common-config-defaults.xml

Improvement

KULRICE-5010: Improve performance for RoleManagementServiceImpl.removePrincipalFromRole

KULRICE-5011: Implement an improved way to delete RELOAD_ACTION_LIST prefs for users

KULRICE-5034: CXF SOAP service logging does not honor log4j.properties

KULRICE-5072: 1.0.3.2 fixes for Tomcat 7 support

KULRICE-5073: use HTML <label> tag in KR htmlControlAttribute tag

KULRICE-5101: Improve messaging for simultaneous workflow actions

KULRICE-5114: Allow config.xml files to include HTTPSessionListeners

KULRICE-5173: Making immutable properties on startup results in an excessive amount of copying

Task

KULRICE-3972: need to be able to sort by column header like on lookups when editing large roles and groups

KULRICE-4904: KC needs FAX to be supported as a Phone type

KULRICE-4905: Display appropriate icon based on attachment type in Maintenance Documents

KULRICE-5028: Apply improvements from KS' perf branch of Rice to 1.0.3.2

KULRICE-5071: Move the 'show blank qualifier' kim toggle from a Config param to a System param

KULRICE-5088: Need to be able to retrieve States based on Alternate Country Code

KULRICE-5144: Create test for multiple attachments

Upgrade Guide: Rice 1.0.3.1 to 1.0.3.2

Please Note: We recommend backing up any data in your database prior to performing an upgrade!

Upgrading the Server Database

Oracle Rice Database

Please execute the **update_final_oracle.sql** upgrade script from the **scripts/upgrades/1.0.3.1 to 1.0.3.2/ final** directory.

MySQL Rice Database

Please execute the **update_final_mysql.sql** upgrade script from the **scripts/upgrades/1.0.3.1 to 1.0.3.2/ final** directory.

Upgrading the Client Database

There are no client database upgrades required.

Dependencies

There are no dependency changes for this release.

Impacting Changes

There are no impacting changes for this release.
