

Breadcrumbs

Modals

Purpose: Defines how to use breadcrumb navigation in Kualiti application interfaces.

Category: Navigation, Breadcrumb

Related jiras: [UXI-386 - Data cannot be retrieved due to an unexpected error](#)

Process Phase:

- UXI JIRA Created (insert link above)
- Component Specification draft complete
- UXI code review complete
- Reconcile with UIM and KRAD existing designs
- Conduct user testing (if needed)
- Routed for review with Kualiti UX Working Group and UX/KRAD Working Group
- Reviewed with KAI
- Rice JIRA Created (in KULRICE Project)
- KRAD Implementation complete
- Component released (insert rice release version below)

Version: 1.0

Description

Breadcrumbs take their name from the *Hansel and Gretel* fairy tale. The brother and sister would drop bread crumbs along the forest path so they could re-trace their steps and find their way home. As such, a breadcrumb for the Web is similar in that it presents a navigational trail where users have been so they can easily get back to where they came from. They also help alleviate cognitive load of remembering previous steps.

Kualiti applications have three different variations of breadcrumbs.

Variations

- Location-based
- Path-based (used mainly in modals and breadcrumbs with only one or two levels)
 - Normal (Bootstrap default)
 - Alt (transparent background)
