

Typography and usage

Tabbed containers

Purpose: This document provides usage and guidance on typography, links, headings, images, and more.

Category: Typography, content

Related jiras: [UXI-402 - Data cannot be retrieved due to an unexpected error](#)

Process Phase:

- UXI JIRA Created (insert link above)
- Component Specification draft complete
- UXI code review complete
- Reconcile with UIM and KRAD existing designs
- Conduct user testing (if needed)
- Routed for review with [Kuali UX Working Group](#) and [UX/KRAD Working Group](#)
- Reviewed with [KAI](#)
- Rice JIRA Created (in KULRICE Project)
- KRAD Implementation complete
- Component released (insert rice release version below)

Version: 1.0

Description

Typography makes up a key aspect of using the web or online applications. The content you read, how it's laid out, the contrast between fore and background, clarity between what's a link and what's not - all of this are things to consider when creating content. In short, typography is as important, if not more important, than the actual content.

Kuali typography

- Headings
- Paragraphs
- Lists
- Links
- Images
- Forms
 - Fieldsets
 - Legends
 - Labels
 - Inputs, Selects, Textareas
- Buttons
- Icons

Kuali typefaces

Kuali applications rely on type families that are included with each system which allows for extremely fast rendering and great compatibility. Font families we use are:

- **Calibri** for headings, with Arial as a fallback
- **Arial** for everything else.
