Process Phase:

- UXI JIRA Created (insert link above)
- Component Specification draft complete
- UXI code review complete
- Reconcile with UIM and KRAD existing designs
- Conduct user testing (if needed)
- Routed for review with [Kuali UX Working Group](#) and [UX/KRAD Working Group](#)
- Reviewed with [KAI](#)
- Rice JIRA Created (in KULRICE Project)
- KRAD Implementation complete
- Component released (insert rice release version below)

Version: 1.0

Description

The Batch File Upload component allows users to upload multiple files of various document types to a web form. This component would be used in situations where a user is expected to upload multiple files to a web form. Rather than uploading each file individually, this component will allow the user to select multiple files and upload all with a single action. This feature will be particularly useful to admin data screens, but should have universal appeal to all types of users.

Prototype file viewable on [our test pages site](#).
