

Kuali Technical Integration - February 6, 2013

Logistics

Date and Time: Every Wednesday, 12:00-1:00pm ET / 11:00-12:00pm CT / 9:00-10:00am PT

Location:

- Video Bridge 220488, Dial 812-856-7060 to connect via phone (conference number 220488#, See [PolyCom Directory](#) for connection info)
- Xmeeting(Mac) : 220488@gk.iu.edu
- Ekiga(Linux) : h232:220488@gk.iu.edu

Mailing List: rice.kti@kuali.org

Agenda

1. Roll Call

2.

3. [KULRICE-8610](#) - Data cannot be retrieved due to an unexpected error - Peter

- Scheduled for inclusion in 2.1.3 / 2.2.1
- <http://site.kuali.org/rice/2.1.3-SNAPSHOT/apidocs/org/kuali/rice/kew/framework/document/security/DocumentTypeAuthorizer.html>

4. Recurring items:

a. JDK7 tes

i.

[KULRICE-7865](#) - Data cannot be retrieved due to an unexpected error JDK7 version of predic8 released today

Attendees

- Eric Westfall
- Gayathri
- Barret
- Erik Meade
- Shannon Hess
- Peter Giles
- Jerry Neal
- Claus Niesen
- Will Gomes
- Jeremy Hanson
- Bryan Hutchinson
- Larry Symms
- Chad Hagstrom
- Jeff Caddel
- David Elyea

Notes

Adding Bootstrap v2.2.2 to KRAD in the 2.3 release - Gayathri

- UX recommends adding Bootstrap (javascript UI library) to help enable some of the UI designs KC are doing
- Jerry - get lots of questions about whether or not we have bootstrap in KRAD
 - very popular within the community
 - we are currently doing this right now with the Fluid library
 - it's not going to force everyone to use Bootstrap
 - as we start looking at common look and feel, need to decide if we want to base it off bootstrap
- Bootstrap - a default set of CSS, similar to Fluid (FSS)
 - working on an analysis task to compare bootstrap and fluid
 - also has a set of different widgets, some are things that we actually need
 - some are widgets we already have, compare to what we are doing now with jquery to determine which direction we need to go with each
- Jerry - two different ways we can go with it
 - right now on the path of two different look and feels, but looking at how we can consolidate it
- Eric - what does it mean to "add" bootstrap to KRAD
 - Jerry - bootstrap is just js and css, so people could use it regardless

- but I think we want to embrace it a little bit more and use it to build our out of the box look and feel
- right now our laf is homegrown css/html
- Eric - what about KS?
 - Jerry - we need to connect up on this with them, they are using Fluid
- Jerry - we can decide how much of bootstrap and how much of fluid we use
 - can cherrypick from either
 - community around bootstrap is growing quickly
- Gayathri - do i need to create a jira?
 - Jerry - no there's a jira out there already, will put in KTI so people can watch it
 - <https://jira.kuali.org/browse/KULRICE-8910>
- Action Items: Jerry will have Tom connect to Kuali Student UX to see how/if bootstrap might be used globally

KULRICE-8610 - Data cannot be retrieved due to an unexpected error - Peter

- Peter - basically, this came from a requirement that Kuali Coeus had to have finer control over what happens during a recall from routing check
- We looked at this and what we came up with was an additional plugin that you can put on a document type that allows you to put a custom authorizer into play on your document type
- DocumentTypeAuthorizer is the new plug point to allow for customization of authorization for actions taken against a document

Open KULRICE JIRAs Marked for KTI Review
