

# Kuali Rice surveys

**We want your feedback! Please complete a 10-question survey - see links below!**

The Kuali Rice team is very interested in feedback related to experience with tools and processes (Kuali and non-Kuali) as input to future planning exercises. This is an open call for feedback!

The surveys below are aimed at hands-on users of the types of tools noted. We are interested in feedback from people working in the IT organizations as well as those working out in the academic departments. The data will not be interpreted to represent official university requirements and strategy (we collect those in ongoing manner as well).

If you work with any tools that include the task domains listed below, we want your input in a 10-question survey (plus a few optional demographic questions)! This will probably take a maximum of 15 minutes, and could be shorter. (Note: these are offline for scheduled maintenance on Wednesdays from 5 to 7 a.m. PST.)

- [Workflow creation and management survey](#)
- [Identity and access management survey](#)

Your data will be aggregated with that of others, and reported in two Birds-of-a-Feather sessions at Kuali Days in November 2011. Your identity will be held in confidence and your input will be factored into the ongoing planning and prioritization exercises for the Kuali Rice roadmap.

Please forward a link to this page to others at your university who work with any of these task domains!

Thank you in advance for your participation! And join us at [Kuali Days 2011!](#)
